

Project Design Phase

Problem – Solution Fit Template

Date	28 June 2026
Name	Kavyasri Meghana karunakaram
Project Name	Automated Network Request Management in ServiceNow
Maximum Marks	2 Marks

Problem–Solution Fit Template

The Automated Network Request Management in ServiceNow project is developed to simplify and automate the handling of network service requests within an organization. In many organizations, network requests are processed manually, which often leads to delays, approval bottlenecks, poor request visibility, and increased workload for IT staff. This solution overcomes these issues by using ServiceNow features such as the Service Catalog, Flow Designer, Approval Workflows, and Email Notifications to automate the entire request process. As a result, requests are processed more efficiently, users receive timely updates, and IT teams can manage requests with greater accuracy and transparency.

Purpose

- Automate the network request process to minimize manual work and save time.
- Provide a self-service portal for users to submit network requests easily.
- Enable real-time tracking of request status with automatic notifications.
- Speed up the approval process through workflow automation.
- Reduce the workload on IT teams by automating routine tasks.
- Improve the transparency, reliability, and efficiency of request management.
- Deliver a better user experience through a simple and automated system.
- Increase organizational productivity by ensuring secure and timely network service delivery.

Problem – Solution Fit Template

Project Title: _____	Date: _____
Prepared By: _____	Version: _____

PURPOSE

- Solve complex problems in a way that fits the state of your customers.
- Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- Sharpen your communication and marketing strategy with the right triggers and messaging.
- Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- Understand the existing situation in order to improve it for your target group.

1. PROBLEM

- 1.1 Customer Segment**
Who are the customers facing this problem?
- 1.2 Problem Statement**
What is the exact problem your customers are facing?
- 1.3 Current Impact**
What are the effects of this problem on your customers?
- 1.4 Existing Alternatives**
What solutions are they using today? Why are they not satisfied?
- 1.5 Root Cause**
What is causing this problem to exist?

PROBLEM – SOLUTION FIT

How well does the solution address the real problem of the customer?

2. SOLUTION

- 2.1 Proposed Solution**
What is your solution to the problem?
- 2.2 Key Features**
What are the main features of your solution?
- 2.3 Benefits to Customer**
How does your solution solve the problem for the customer?
- 2.4 Unique Value**
What makes your solution better or different?
- 2.5 Success Measures**
How will you measure if your solution is successful?

3. EVIDENCE OF FIT

Evidence Type	Description	Source / Method	Key Findings
Customer Feedback			
Survey / Interviews			
Prototype Testing			
Usage / Behavior Data
